

The logo for REJLERS, featuring a stylized graphic of three horizontal lines to the left of the word "REJLERS" in a bold, sans-serif font.The word "ACCELERATED" in a bold, white, sans-serif font, set against a dark blue rectangular background.The word "FLEET" in a bold, white, sans-serif font, set against an orange rectangular background.A background image of a rugged, rocky mountain landscape with a hazy sky. Two small figures are visible on a rocky outcrop in the lower center of the frame.

# *Smarter Management for Smart Connected Devices*

*Rejlers Fleet Manager is a complete solution for management and optimization of field based assets such as liquid or gas containers, field transport vessels, vehicles, instruments or tools.*

## Customer requirements

**“** *In our business visibility to location and status of our containers was crucial to offer better service to our clients.*

## Why Rejlers

Industry and technology independent solution for any fleet management needs

Rapid time-to-market with fast customization and implementation

Various sensor connectivity options, such as temperature, pressure etc

Rejlers expert support for both technical and application area expertise.

# ACCELERATED FLEET

## What

Rejlers Fleet Manager is a complete solution for management of field based assets such as liquid or gas containers, transport vessels, vehicles, instruments or tools.

## Benefits

### ➤ Monitor

Monitor the position and status of connected device on your desktop or a mobile device

## Management hierarchy chart

➤ **Accelerate  
your Fleet**

➤ **Optimize**  
Optimize the utilization rate,  
productivity and service intervals  
of field based systems using  
state-of-the-art data analytics

## ***Delivery scope***

- Digital concept determination
- User story definition
- Data integration architecture
- Data model planning
- Analytics tool configuration
- System connectivity and integration
- Web Portal and mobile application Implementation
- System maintenance and training

## ***Advantages***

Providing both mobile and web-based applications, it allows users to optimize the productivity of their equipment with one easy-to-use and rapid-to-operate system.

## ***Target Application***

Any application where location and device status can be used to optimize the utilization rate, service interval or other measure of performance, e.g. containers, vessels, field equipment, mobile systems, vehicles or others.
